I am trying to populate a split view in iphone with information from my local sqlite file i have downloaded from web. Below is the code i have written in the viewDidLoad method. The problem is that, the web data is not being populated in the table. I have checked the table in the sqlite browser and it shows the data I have in my sqlite file. Any help is really appreciated. NSArray *documentPaths = NSSearchPathForDirectoriesInDomains(NSDocumentDirectory, NSUserDomainMask, YES); NSString *documentsDir = [documentPaths objectAtIndex:0]; NSString *path = [documentsDir stringByAppendingPathComponent:@"sample.sqlite"]; if(sqlite3_open([path UTF8String], &database)!= SQLITE_OK) { sqlite3_close(database); NSLog(@"Failed to open database"); return; } int numberOfRows = 0; sqlite3_stmt *statement; const char *sql = "SELECT * FROM employees"; if(sqlite3_prepare_v2(database, sql, -1, &statement, NULL)!= SQLITE_OK) { sqlite3_finalize(statement); NSLog(@"Failed to create statement"); return; } while (sqlite3_step(statement) == SQLITE_ROW) { NSString *firstName = [[NSString alloc] initWithUTF8String:(char *)sqlite3_column
